

Robinson 44

The Robinson 44 - Raven II is probably the most common helicopter in operation today. It's reliability and affordable operational costs make it a favourite in most helicopter operations in its class.

The R44 Raven II is powered by one Lycoming IO-540 Fuel injected normally aspirated engine. It is certified for single pilot operation and can carry three passengers.

Robinson 44

The R44 Raven II boasts excellent reliability, responsive handling, altitude performance and a favourable airspeed of up to 130 knots.

This helicopter is perfectly suited for the application requiring 2 passengers with luggage.

What's more is the excellent view one has from this helicopter, lending itself to happy memories for the many who have experienced flying in this aircraft.
